

# *Time zones vs. relativity*

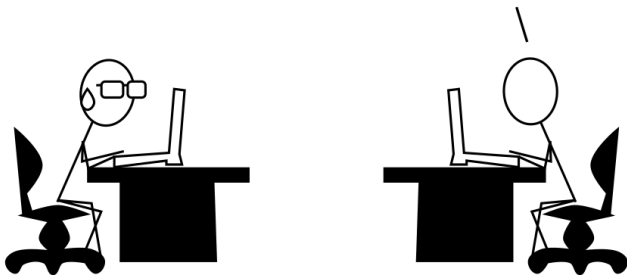

*Arg! I hate developing with time zones. It's very unintuitive.*

*We should praise us lucky, since time zones only modify time with plus and minus.*

*If we worked with space travel, then we would modify time with multiplication and division, because of relativity theory.*

*48 hours with 80 % of light speed would change:  
2021.01.14 13:45:00 -> 2021.01.15 21:45:00*

*I'm happy I only have time zones!*
